

An App Concept made by Carl Kho & Nickie Himaya

Describe the problem you're trying to solve

1. The irony of going out to get treated in the midst of COVID; Access to Medicare.

- Distance and commuting
- Stressing over the looming sensation of unknown feelings
- Long, unnecessary, and risky queues

Describe the research you did on the way to developing your app

- 2. Since health is in my hands. I researched a lot

  (I like learning win-win)
  A. The Concept of
  - Telemed
    I. Adhered to national &
    international standards
  - II. I mit at ed EHR syst em vi a uncl e who's a PT in Canada
    - III. How an Electric Prescription Works

### B. COVID Monitoring

I. Basic self-monitoring sheet

II. Specific areas in monitoring like the lungs and diabetic people risk

C. Patient Privacy

I. Ph's data privacy act RA 10173

II. HI PAA Compliance

#### D. Business Model

Prepay the doctor x amount for x hours, every patient pays x. Profit depends on patients.

Prepay the doctors 5K for 3 hours

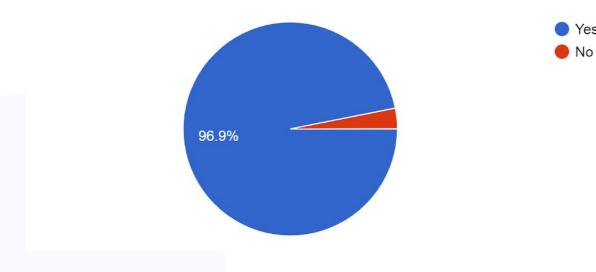

Each consultation lasts about 20 minutes

9 patients per doctor (8 100 php, 3 100 profit)

If less than 6 patients: loss.

### E. UI/UX Testing (Patient)

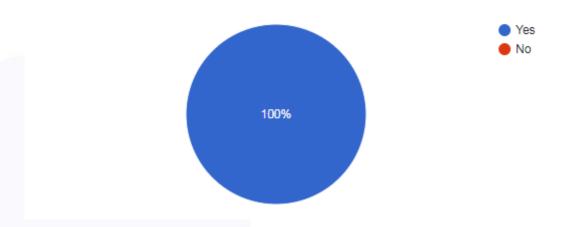

If you could visit a doctor virtually, would you?
32 responses

- I. Open to the idea of Telemed
- II. Unnecessary exposure
- III. Troublesome Commuting
- IV. Uncertainty of availability

# E. UI / UX Test i ng( Pat i ent )

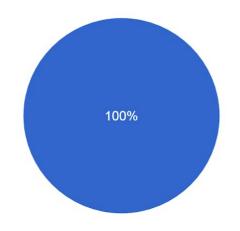

Would you recommend this app to your family and friends?
32 responses

V. 100 Recommended

### F. UI/UX Testing (Doctors)

If you could visit a patient virtually, would you? 8 responses

YesNo

- I. 100 percent said risk of exposure
- II. Overall got the tasks done
- III. Pseudo-patient contact is good
- IV. They would suggest it to patients if its free

## Describe & demonstrate the design of your project

- For a Diverse Audience so Clear and solid typography with with sans-serif fonts for easy s
- Ul is super easy & accessible with different levels
   Color of tech-literacy
  - Color contrast for quick navigati with bright colors to attract us to interactive zones of the layo
- Intuitive Navigation
- High Readibility
- Li ght Background emphasizes cont ent
- Eye-cat chi ng vi sual s

What makes your project unique?

Introduces a f or ei gn but essent i al sol ut i on current I y crafted around and beyond the problem we are facing. Encour ages t he transition t owar ds a hassle-free accur at e digital era via t he

cent ral i zat i on El ect roni c of Health Records. Has a selfsust ai ni ng busi ness model. Pr ot ect s t he very t r easur e of humani ty: while lives, t he reduci ng t hr eat of exposure t o mor e di seases promot i ng and

ear I y det ect i on, t her ef or e r educi ng t he pot ent i al costs pat i ent s. of wi I I Ti me be spent on product i vi t y instead of long waiting, leading to the growt h of our very own count ry.
