?

Ever since 2016, my family would attend church at [SM City Cebu](#) on a weekly basis.

> "The mass has ended; go in peace."

Zooooooom! Right after that line, I would temporarily sever ties with my family* and run straight to [SM Cyberzone](#). You know what I'm talking about. I would visit the following stores in this exact order:

- [DataBlitz](#)

- [ITech](#)

- [Nutech](#)

- [Thinking Tools, Inc.](#)

- [PC Quickbuys—SM](#)

I had no money, but I also had no shame.

I would drop dead in front of the glass where they'd display the latest [NVIDIA](#) Card and (mentally) drool all over the place. Even after I got my first PC build, I would still go to the latter stores to clickity-clack my way with the displayed [HyperX](#) gear, in hopes of getting sympathy from the workers. I thought they would feel sorry for me after countless times of visiting and decide to just give one of their stocks away. That didn't happen, obviously.

Fast forward today, I have just finished building my dream setup with a few extras! The famed [SIHOO](#) M57 chair, check. A wireless headset + a stand just as prestigious (it charges the mentioned headset and has a base dedicated for Qi Wireless Smartphone charging. Exceptional stuff, [Lenovo Legion](#)!), check.

I could go on and on about what I got for myself, but that would be unnecessary*.

It's all thanks to [Symph](#) with their generous workspace subsidy of 15 000. I've been in this company for 1.8 years now, and it's been nothing but fun and growth. Please read this in a less marketing-ish voice. It's genuine. I'm not being held hostage by Bryant. Swear!

We're hiring and we're looking for Mid-Level Full Stack Developers with 3 years of experience. This pays a salary that goes up to 90 000/month!

More info about other roles in the comments.

Shirt by [3VO](#) cc ang gwapong [Timothy](#)

1 lol—I love my choice of words

2 I also got an arm monitor stand, an "adopted" wireless [Keychron](#) ([RK Royal Kludge](#) 84), the famed [Logitech G](#) G502, and an aesthetically-pleasing digital clock.
